

PALSIT is organizing

INFOSEK 2009 Conference

19th and 20th November,
Slovenia, Nova Gorica (Perla hotel)

ACCOMMODATION AND RESERVATION

Conference shall take place in the Perla Hotel Congress Centre there for we recommend you to stay in the Perla Hotel or in the Sabotin Hotel which lies approximately 2 km away.

Hit has been for decades the biggest and most successful Slovenian gaming and tourist company. With its excellence-oriented company culture, it knows how to listen and attend to even the most demanding guest wishes. Therefore it also knows how to attend to business guests who want to offer their colleagues a creative and relaxed working environment and a colourful combination of entertainment, games, culinary specialities and sports and cultural events.

We recommend the participants to make direct reservations in the above mentioned hotels under the code "INFOSEK", at the same time we ask you to forward us the reservation confirmation to vera@palsit.com, so that we can ensure enough rooms. Perla holds the reservation for conference participants at special price til **5th November 2008**.

Every participant is entitled to:

- * free entrance in the casino of the Perla Hotel
- * free entrance in the discotheque
- * guests of the Perla Hotel are also entitled to free use of swimming pools and sauna
- * it is also arranged for the night transfer to Sabotin Hotel (every hour, all night).

Every guest is entitled to free parking in the garage of the Perla Hotel!

How to protect better?

The central Slovenian event for information security!

INFOSEK 2009 Conference

19th and 20th November, Slovenia, Nova Gorica (Perla hotel)

For the seventh year in a row we try to highlight the importance of information security among Slovene companies / organizations and in wider region.

Leading security topics, with leading experts: up-to date sessions, good practices, emerging trends and a lot of opportunities for networking and exchanging opinions:

In terms of contents we have divided the lectures in the following groups:

- * Biometrics
- * Card business security
- * Outsourcing
- * Network Security
- * Hacking
- * Business Continuity and Crisis Management
- * SOA and security
- * Information Security Standardization
- * Security Management
- * Auditing internal controls

Considering the ever increasing dependency on information technologies the continuous education is of key importance for the protection from security incidents.

ABOUT CONFERENCE...
